### Brief Prescribing Information:

Ceforal-3 (Cefixime USP) Capsules 400mg & Oral dry suspension 100mg/5ml, Cefixime is orally active, third generation antibiotic, clinically proven against vast variety of micro-organisms including gram-positive and gram-negative. **INDICATIONS:** Respiratory tract infections, ear, nose and throat infections, urinary tract infections biliary tract infections etc. **DOSAGE & ADMINISTRATION:** Absorption of Cefixime is not significantly altered by the presence of food. The usual course of treatment is 5-14 days. **Adults & Children over 12 years:** The recommended adult dosage is 400mg daily administered as a single dose. **Children:** (Use Paediatric Oral Suspension) The recommended dosage for children is 8mg/kg/day administered as a single dose. As a general guide for prescribing in children, the following daily dose in terms of volume of Paediatric Oral Suspension are suggested Children 1-4 years: 5ml daily, 5-9 years: 10ml daily, 10-12 year: 15ml daily. The dosage in children aged 6 months to one year should be calculated in mg/kg basis. children weighing more than 30kg or older than 12 years should be treated with recommended adults dose. The safety and efficacy of Cefixime has not been established in children aged less than 6 months. **The Elderly:** Elderly patients may be given the same dose as recommended for adults. Renal function should be assessed and dosage should be adjusted in severe renal impairment. **CONTRA-INDICATION:** Patients with known allergy to the Cephalosporin group of antibiotics. **PRECAUTIONS & WARNINGS:** Previous hypersensitivity to cephalosporins penicillins or other drugs. Particular care should be exercised in patients with severe gastrointestinal disturbances involving diarrhoea. Use in pregnancy & breast Feeding: Cefixime should be used during pregnancy when benefits outweigh the risks. It is not known whether Cefixime is excreted in human milk. **DRUG INTERACTIONS:** A prolonged prothrombin time has been reported in patients who had been administered Cefixime and anticoagulants of the coumarin-type. **OVERDOSAGE:** There have been limited clinical experiences with overdose of Cefixime to date. **ADVERSE REACTIONS:** Anaphylactic reaction, fever, Steven-Johnson Syndrome, Leukopenia, Eosinophilia, Thrombocytopenia, Increase in SGOT, SGPT and alkaline phosphatase, Senous colitis (Such as pseudomembranous colitis), Diarrhoea, Abdominal pain, Headache, Dizziness. **PHARMACEUTICAL PRECAUTIONS:** Store in cool, dry place & protect from light. **DIRECTION FOR RECONSTITUTION:** Please see carton for reconstitution of granules for Paediatric oral suspension. **PACKING:** Capsules 400mg bottle containing 5 capsules. Granules for Paediatric Oral Suspension (100mg/5ml after reconstitution), 60ml bottle containing granules for preparation of 30ml suspension. **PRESENTATION:** Ceforal-3 Capsules 400mg 5's Pack size, Ceforal-3 dry oral suspension 100mg/Packing.
