- Economical & Affordable.

INDICATIONS

Amebiasis

Acute intestinal amebiasis (amebic dysentery)
Amebic liver abscess.

Anaerobic Bacterial Infections

Bacterial Septicemia.
Intra-abdominal & Gynecological Infections.
Central Nervous System Infections.

Trichomoniasis:

Brief Prescribing Information:

Composition: Metrida Tablet contains: 200mg & 400mg Metronidazole per tablet. Metrida Suspension contains: 200mg/5ml Metronidazole. Metrida Infusion contains: Metronidazole BP 0.5% w/v. **Mechanism of Action:** Metrida (Metronidazole) is reduced to a product which interacts with DNA to cause a loss of helical DNA structure and strand breakage resulting in inhibition of protein synthesis and cell death in susceptible organisms.

Contraindications: Known hypersensitivity to metronidazole. **Pregnancy & Lactation:** There is inadequate evidence of the safety of metronidazole in pregnancy. Metrida should not therefore be given during pregnancy or during lactation unless the physician considers it essential; in these circumstances the short, high-dosage regimens are not recommended. **Presentation & Price:**

Metrida Tablets 200mg pack of 20x10's in a pack.
Metrida Tablets 400mg pack of 10x10's in a pack.
Metrida Oral Suspension bottle of 60ml.
Metrida Infusion 0.5% w/v (100ml)

DOSAGE

Oral

Adults: 200-400mg three times daily in general.
Children: 7.5mg/kg three times daily.

Intravenous Infusion

Metrida injection should be infused intravenously at an approximate rate of 5ml/min. Oral medication should be substituted as soon as feasible.

Adults: 500mg three times daily.
Children: 7.5mg/kg three times daily
