BRIEF PRESCRIBING INFORMATION:

Composition: Each soft gelatin capsule of Nifedil SG-10 contains active substance 10mg nifedipine. **Indications:** Treatment of Hypertensive Crises, treatment of Hypertension, treatment of coronary heart diseases (Prinzmetal angina), treatment of Raynaud's Syndrome. **Contraindications:** Nifedil SG-10 must not be used in cardiovascular shock, severe aortic stenosis, or in patients known to be hypersensitive to nifedipine or decompensated heart failure, nifedipine passes into milk. Breast-feeding should be stopped if nifedipine treatment is needed during lactation. **Side Effects:** Transient headache and flush with a sensation of warmth particularly at the beginning of the treatment, reflex tachycardia, palpitation due to vasodilatation, ankle oedema. There may also be dizziness and tiredness, tingling sensation in the arms and legs (Paresthesia), and lowering of blood pressure below normal. Gastrointestinal disturbances like nausea feeling of fullness, diarrhoea occurs in rare cases. Skin hypersensitivity like itching, urticaria and rashes. Acute systemic allergic reaction such as swelling of skin & mucosal edema of the glottis, bronchospasm and dyspnea which are reversible on withdrawal of drugs. May impair the ability to drive or to operate machinery. **Interactions with other drugs :** The blood-pressure-lowering effect of nifedipine may be potentiated by other antihypertensives and by tricyclic antidepressants. The effects on blood pressure and heart rate are potentiated on combination with nitrates. Diltiazem attenuates the degradation of nifedipine, dose adjustment is needed when combined with beta-receptor blockers, nifedipine may increase plasma level of digoxin & theophylline. **Dosage guidelines:** 1 soft gelatin capsule of Nifedil SG-10 three times a day or as directed by the physician. **Presentation:** Nifedil SG-10, Pack of 30 capsules each containing 10mg nifedipine.
