

Maximizing Manhood

TESTONON *Injection*
250mg/ml
(Testosterone Compound)

An Ultimate Androgen Replacement Therapy (ART)

- ♂ Blend of four Testosterone components
- ♂ Fast acting and has a long life in blood
- ♂ Lasts up to 4 weeks in the system
- ♂ Less aromatization and less water retention
- ♂ Helps to Manage Male climacteric symptoms
- ♂ Improves Libido and sexual functions

Dosage and Administration:

Testonon Injection is for intramuscular use only. It should be given deep in the gluteal muscle. Usually one injection of 1ml: 250mg per three week is adequate.

Rx Information: Composition: Testonon Injection for intramuscular, contains Testosterone Propionate 30mg. Testosterone Phenyl propionate 60mg. Testosterone Isocaproate 60mg, Testosterone Decanoate 100mg.

Indications: Androgen replacement therapy in male hypogonadal disorders for Example: After castration, eunuchoidism; hypopituitarism; endocrine impotence; male climacteric symptoms such as decreased libido and decreased mental and physical activity. **Contraindications:** Known or suspected prostatic or mammary carcinoma. **Precautions:** If androgen-associated adverse reactions occur, treatment should be interrupted and, after disappearance of the symptoms, be resumed at a lower dosage. Patients with latent or overt cardiac failure, renal dysfunction, hypertension, epilepsy or migraine (or a history of these conditions) should be monitored, Since androgens may occasionally induce salt and fluid retention. Androgens should be used cautiously in prepubertal boys to avoid premature epiphyseal closure or precocious sexual development. A decrease in protein-bound iodine (PBI) may occur, but this has no clinical significance, **Side Effects:** Priapism and another sign of excessive sexual stimulation. In prepubertal boys, precocious sexual development, and increase frequency of erections, phallic enlargement and premature epiphyseal closure. Oligospermia and decreased ejaculatory volume. Water and salt retention. **Presentation:** Testonon injection 250mg 1x1 ml ampoule.
