Zaclazide Provides effective blood sugar control and reduces secondary failure in type II diabetic patients vs Glibenclamide & Glipizide.

Harrower ADB, Wong C. Comparison of secondary failure rate between three second-generation sulfonylureas. (*Diabetes Res*: 1990;13:19-21)

Zaclazide is highly selective for the β -Cell (SUR I) which means Zaclazide is cardiac friendly as compared to Glibenclamide & Glimepiride.

	β -cell:cardiac selectivity ratio*
Glimepiride ¹	1.8
Glibenclamide ²	6
Zaclazide ³	16 000

*Ratio of sulfonylurea concentrations, at cloned β -cell vs cardiac channels, having 50% maximum effect.

Zaclazide is very cost effective for all diabetic patients.
