

Agony to Bliss

Zimes
(Esomeprazole)
20mg & 40mg Capsules

Takes care of your Patients

Zimes

(Esomeprazole)
20mg & 40mg Capsules

Takes care from agony to bliss

Gastroesophageal Reflux Disease
Non Erosive GERD
Erosive GERD

Healing Rate

CONCLUSION:
Esomeprazole (**Zimes**) demonstrates significantly greater efficacy than omeprazole in the treatment of GERD patients with erosive esophagitis. The tolerability and safety of esomeprazole are comparable to that of omeprazole.*

DOSAGE REGIMEN

Gastroesophageal Reflux Disease (GERD)

Healing of Erosive Esophagitis	20mg or 40mg	Once Daily for 4 to 8 Weeks
Maintenance of Healing of Erosive Esophagitis	20mg	Once Daily
Symptomatic Gastroesophageal Reflux Disease	20mg	Once Daily for 4 Weeks
12 to 17 Year Olds		
Short-term Treatment of GERD	20mg or 40mg	Once Daily for up to 8 Weeks

H. pylori Eradication to Reduce the Risk of Gastro-Duodenal Ulcer Recurrence

D-Ulcer Healing Rate

CONCLUSION:
Esomeprazole (**Zimes**) based triple therapy is sufficient for DU healing and H. pylori eradication in patients with DU disease.**

DOSAGE REGIMEN

H. pylori Eradication to Reduce the Risk of Gastro-Duodenal Ulcer Recurrence

Triple Therapy

Zimes	40mg	Once Daily for 10 Days
Amoxicillin (Zoxicillin)	1000mg	Twice Daily for 10 Days
Clarithromycin (Maclara)	500mg	Twice Daily for 10 Days
Pathological Hypersecretory Conditions Including Zollinger-Ellison Syndrome	40mg	Twice Daily

Zimes

(Esomeprazole)
20mg & 40mg Capsules

Takes care from agony to bliss

**NSAIDs
Associated
Ulcer**

G-Ulcer Healing Rate

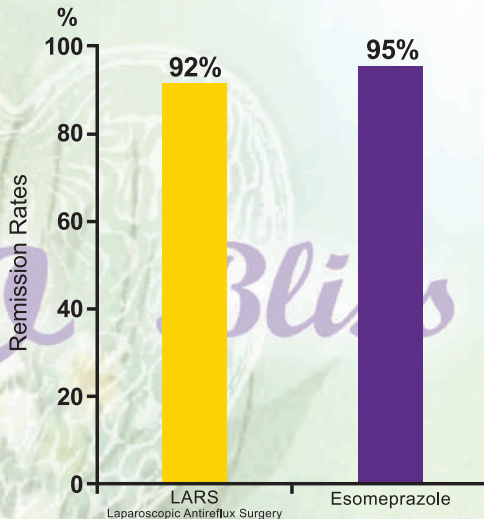

CONCLUSION:

In patients who require continued NSAIDs therapy, GU healing rates to follow at 8 weeks numerically favoured esomeprazole.***

Risk Reduction of NSAID Associated Gastric Ulcer	20mg or 40mg	Once Daily for up to 6 months
--	--------------	-------------------------------

Significant Remission Rates

CONCLUSION:

The study concluded that either PPI therapy with Esomeprazole or LARS for GERD control has similar beneficial effects on the patients, by facilitating them to remain in a state of remission for 5 years.***

Zimes

(Esomeprazole)
20mg & 40mg Capsules

Takes care from agony to bliss

Cost
Effective

- Superb acid control
- Superb GERD symptoms relief
- Superb healing of Erosive Esophagitis
- Superb results in H.pylori eradication
- Superb control of NSAIDs induce Ulcer
- Superb control of hypersecretory conditions
- Available in Alu-Alu blister packing, safe from sunlight and moisture

COMPOSITION: Zimes 20mg & 40mg capsules. Each capsule of Zimes contains Esomeprazole Magnesium Trihydrate enteric coated pellets equivalent to Esomeprazole 20mg and 40mg. **INDICATIONS:** Treatment of Gastroesophageal Reflux Disease (GERD), Healing of Erosive Esophagitis, Maintenance of Healing of Erosive Esophagitis, Symptomatic Gastroesophageal Reflux Disease, H. pylori Eradication to Reduce the Risk of Duodenal Ulcer Recurrence, Pathological hypersecretory conditions, including Zollinger-Ellison syndrome. **DRUG INTERACTIONS:** Esomeprazole is extensively metabolized in the liver by CYP2C19 and CYP3A4. Esomeprazole inhibits gastric acid secretion. Therefore, esomeprazole may interfere with the absorption of drugs where gastric pH is an important determinant of bioavailability (e.g., ketoconazole, iron salts and digoxin). Co-administration of oral contraceptives, diazepam, phenytoin, or quinidine did not seem to change the pharmacokinetic profile of esomeprazole. **COMMON SIDE EFFECTS:** Headache, abdominal pain, diarrhea, flatulence, nausea, vomiting, dermatitis, dry mouth, Stomatitis insomnia Rashes, Malaise, increased sweating. **WARNING AND PRECAUTIONS:** General: Symptomatic response to therapy with Zimes does not preclude the presence of gastric malignancy, Carcinogenesis, Mutagenesis, Impairment of Fertility: Esomeprazole was negative in the Ames mutation test, in the in vivo rat bone marrow cell chromosome aberration test, and the in vivo mouse micronucleus test. Esomeprazole, however, was positive in the in vitro human lymphocyte chromosome aberration test. **DOSEAGE:** GERD: 20 or 40 mg once daily for 4 to 8 weeks. Maintenance of healing of erosive esophagitis 20 mg once daily. For symptomatic reflux disease 20 mg once daily for 4 to 8 weeks. H. pylori eradication to reduce risk of duodenal ulcer 40 mg daily for 10 days along with Amoxicillin 1000 mg twice daily for 10 days & Clarithromycin 500 mg twice daily for 10 days. NSAIDs 20 to 40mg once daily upto six month. **PRESENTATIONS AVAILABLE:** Zimes 20mg Capsules: available in alu-alu blister pack of 2x7 capsules. Zimes 40mg Capsules: available in alu-alu blister pack of 2x7 capsules
