Brief Prescribing Information:

Composition: Each Zorat tablet contains 10mg loratadine. **Description:** Zorat is a potent long-acting tricyclic antihistamine with selective peripheral H₁ receptor antagonistic activity. **Indications:** Zorat is indicated for the relief of symptoms associated with allergic rhinitis. Such as sneezing, as well as ocular itching and burning. Nasal and ocular signs and symptoms are relieved rapidly after oral administration. Zorat is also indicated for relief of symptoms and sign of chronic urticaria and other allergic dermatologic disorders. **Dosage:** Adults and children 12 years of age and over: One Zorat tablet once daily. **Contraindications:** Hypersensitivity to the drug. **Precautions:** Safety and efficacy of Zorat in children younger than 12 years of age have not yet been established. The safe use of zorat during pregnancy has not been established and therefore, the compound should be used only if the potential benefit justifies the potential risk to fetus. Since Zorat is secreted in breast milk, caution should be exercised when zorat is administered to a nursing woman. **Presentation and Price:** Tablets Pack of 10 in blister
