

- Provides quick relief
- Efficacy lasts longer
- No excessive dryness to Nasal Mucosa
- Well established safety in paediatrics

Xynosine CF

Xylometazoline HCl 0.05%

Prescribing Information:

Composition:

Xynosine Children Formula contains 0.05% Xylometazoline HCl in isotonic aqueous buffered solution. How it work: Xylometazoline HCl is a sympathomimetic agent. It works as a vasoconstrictor. It acts rapidly and remains active for 8 hrs. It reduces swelling and congestions in nasal mucous membrane.

Indications:

- blocked runny nose,
- congestion associated with cold, sinusitis and hay fever.
- excessive nasal secretions, stuffy nose, Allergic rhinitis.

Dosage:

For children 2-12 years of age 1 to 2 drops in each nostril once or twice daily.

Cautions:

The prolonged use of vasoconstrictor agent is not indicated in case of chronic rhinitis. Not recommended in children below the age of 3 months.

For children under 2 years of age consult your doctor.

To avoid infection only one nasal spray should be used by one patient only.

How to apply:

- Clear or wipe the child nose
- Keep the child head right back
- Apply one or two drops to each nostril.

Presentation:

Bottle containing 15ml solution.

Xynosine

Xylometazoline HCl 0.1%

Prescribing Information:

Composition:

Xylometazoline Hydrochloride 1: 1000 in isotonic aqueous buffered solution:

Description:

Xynosine (Xylometazoline HCl) is a sympathomimetic agent. It is a vasoconstrictor with a rapid and prolonged action in reducing swelling and congestion when applied to mucous membrane. It is used in 0.1% solution two or three times daily for the relief of nasal congestion caused by rhinitis and sinusitis. Indications: Acute cold, vasomotor rhinitis, to facilitate rhinoscopy, Hay fever.

Dosage:

One spray into each nostril at 6 to 8 hours intervals. The nebulizer should never be used for children.

Note:

Keep yourself in upright position during taking spray to avoid excess dosage, sensitive patients occasionally complain of mild burning sensation or transitory dryness in the nose and pharynx with xylometazoline. The prolonged use of vasoconstrictor agents is not indicated in cases of chronic rhinitis.
