ZAMPRA

(Omeprazole) Capsule 20mg

THE ACID-PUMP INHIBITOR

- *A unique mode of acid inhibition*
- *Control the final step of acid secretion*
- *Effective eradication of H. Pylori in combination*
- *Excellent healing*
- *Quicker pain relief*
- *Remarkably well tolerated*

Recommended dosage regimen for the eradication of H. Pylori in combination.

Active Duodenal Ulcer associated with H. Pylori infection (7 - 10 days therapy)	
Clarithromycin (Maclara) 500mg Tab. every 12 hourly	
Plus	Omeprazole (Zampra) 20mg every 12 hourly
Plus	Amoxicillin (Zoxicillin) 1gm every 12 hourly

Active Duodenal Ulcer associated with H. Pylori infection (28 days therapy)	
Days 1 - 14	Days 15 - 28
Clarithromycin (Maclara) 500mg Tab. every 8 hourly	
Plus	
2 Cap. Omeprazole (Zampra) 20mg every morning	1 Cap. Omeprazole (Zampra) 20mg every morning

PRESCRIBING INFORMATION

DESCRIPTION: ZAMPRA (Omeprazole) reduces gastric acid secretion through a selective mode of action. ZAMPRA produces specific dose dependent inhibition of the enzyme H^+ , K^+ - ATPase (The Proton pump), in the Parietal cell. As this action inhibits the final stage of gastric acid formation there is effective inhibition of both basal and stimulated acid secretion irrespective of the stimulus to acid formation. **COMPOSITION:** Each capsule contains 20mg Omeprazole. **INDICATIONS:** Treatment of Duodenal Ulcer, Gastric Ulcer, Reflux oesophagitis, Zollinger - Ellison Syndrome. **DOSAGE:** In duodenal ulcer, Gastric ulcer and Reflux oesophagitis the recommended dosage is 20mg ZAMPRA daily. In Zollinger-Elison Syndrome the recommended initial dosage is 60mg ZAMPRA once daily and maintenance dose is 20-120mg daily. The doses above 80mg daily should be divided and given twice daily. **CONTRAINDICATIONS:** Hypersensitivity to omeprazole. **SIDE EFFECTS:** ZAMPRA is well tolerated. Nausea, headache, diarrhoea, constipation and flatulence have been reported but are rare and skin rashes occurred in a few patients. **PRECAUTIONS:** Patient with severe liver disease should not require more than 20mg ZAMPRA daily. ZAMPRA should be used with caution in pregnancy and lactation. When gastric ulcer is suspected, the possibility of malignancy should be excluded as treatment may alleviate symptoms and delay diagnosis. **PRESENTATION & PRICE:** Capsules Pack of 14's
